<p>Please comment briefly on specific aspects of this instructor's teaching which in your opinion particularly deserve praise and criticism such as assignments, grading, testing, methods of instruction, enthusiasm, etc.:</p>
<p>after the first test it was required to have a consultation with him about what you got.</p>
<p>Dr. Iliev presented the material in a clear an organized way and was always prompt and willing to answer questions. He deeply described many Calculus methods/formulas and where they were derived from in a concise manner. My only concern is that sometimes Dr. Iliev holds the class over for a few minutes on rare occasion, which can make it difficult to make it to other classes punctually.</p>
<p>Dr. Iliev was a good lecturer in that he was thorough over the topics. The tests and homework include questions that are much more complex than lecture material. He also rarely released on time always going over by a few minutes.</p>
<p>He is a very detailed person. More specifically, his notes are very detailed and he is very good at explaining the material. It is clear that he knows what he is teaching very well.</p>
<p>I hope the instructor can use the class time much more effectively.</p>
<p>Illiev's style of teaching and methods of solving the problems is a lot different than what I was taught in AP Calc. At first it really threw me off, but I ended up getting used to it.</p> <p>I like Illiev. He is super helpful and is always willing to go the extra mile to make sure that we understand the material.</p> <p>100% would take him again as my teacher if I could.</p>

<p>Dr. Iliev ways are teaching really suprised me and i found them extremely helpful in terms of my learning. You would work through problems and topics in such an effective way ive never seen before. Dr Iliev was more focused on his students understanding the concepts and true meanings of calculus rather than just shortcuts and getting the right answer like ive been taught before. Really a GREAT teacher!</p>
<p>Outstanding enthusiasm during lectures, kept me engaged! Comedic calculus should be the name of the course! Wish there were more in class activities, more feedback on written assignments, and harder examples worked out in class</p>
<p>The way Dr. Iliev taught the class was great. He did not just simply tell us the rules for finding solutions and ask us to memorize them. He guided us through deriving the solutions and understanding where they come from and their importance. He always looks for us to prove what we are doing and not simply write down the answers. This helped me because it let me find my mistakes and correct them. His method of teaching this class is phenomenal. The assignments in the class were helpful and useful for preparing for tests and gave the class a way to see what they are doing right and wrong. The tests were a good measure of the topics learned and were doable with proper practice and studying. One thing I would like to point out about Dr. Iliev as a point of praise is that he does not stray away from the topics at hand and does not go off on useless tangents. Unlike many professors he stays on topic and explains them thoroughly. He also does not skip over topics and makes sure to go over all topics. One point of criticism that I have was that sometimes he was slow to grade assignments. One of the assignments we only received the day before the test and that was not enough time to review them before the test. With the assignments I think Dr. Iliev should collect them 1 1/2- 2 weeks before tests so that they can be graded and returned in time to review. Dr. Iliev was a phenomenal professor and made the class understand what they were doing.</p>
